EDUCATION

CENTRE OF EXCELLENCE GOVT.
BOYS HIGH SCHOOL
JARANWALA
2022 - 2024

- Matric
- 100% / 74%

PANJAB COLLAGE JARANWALA
2024 - 2026

- Intermediate of Computer
Science (ICS)

CO-CURRICULAR ACTIVITIES

Arduino RC Cars

- Created small remote-controlled cars using Arduino
- Used basic sensors and motor drivers for movement and obstacle detection
- Learned about electronics, circuits, and programming with Arduino

PROFILE

Aspiring Full-Stack Web Developer with a solid foundation in modern PHP frameworks and hands-on internship experience. Proficient in Laravel (Eloquent ORM, Blade templating, Artisan CLI), PHP (OOP), and RESTful API design. Skilled at building responsive UIs using Bootstrap and Tailwind CSS, and integrating features like file uploads, custom notifications, and JWT-based authentication. Quick learner who thrives in collaborative, agile environments and is passionate about writing clean, maintainable code.

WORK EXPERIENCE

Borcelle Studio

2024 JUNE - JULY 2024

Junior Frontend Web Developer

- Partnered with clients to gather requirements and recommended layout strategies—focusing on user journey, content prioritization, and brand consistency
- Built fully responsive agency websites from scratch using semantic HTML5, modern CSS (Flexbox, Grid), JavaScript for interactivity, and Bootstrap utilities for rapid prototyping
- Implemented custom components (navigation menus, carousels, modals) using vanilla JS and Bootstrap's JavaScript plugins, enhancing UX without heavy frameworks
- Ensured cross-browser compatibility and mobile-first responsiveness, conducting thorough QA on desktop, tablet, and mobile viewports

SKILLS

PHP & Laravel

- Laravel Core (Eloquent ORM, Blade Templating, Artisan CLI)
- Livewire for SPA
- RESTful API Development & Authentication
- Database Design & Migrations (MySQL, Seeder, Query Optimization)

Front-End

- Semantic HTML5, CSS3, Tailwind CSS, Bootstrap 5
- Responsive design & mobile-first development

Tooling & Workflows

- Version Control (Git, GitHub)
- Composer & NPM package management

PROJECTS

Restaurant Website

- Tech Stack: Pure PHP (OOP), AJAX, JavaScript, HTML5, Bootstrap 5, CSS3
- Designed a fully responsive, Built an admin panel to manage menu items, categories, and reservations using PHP classes and MySQL

Laravel E-commerce Platform

- Developed a fully functional e-commerce website using Laravel with features like product listing, cart system, Stripe-based secure checkout, admin panel for managing orders, products, categories, and coupons
- Engineered a full-feature online-storefront with product catalog, category filtering, faceted search, and dynamic cart powered by Livewire components for near-SPA interactivity

Apple Vision Pro Clone Website

- Tech Stack: HTML5, CSS3, GSAP, ScrollTrigger, Locomotive Scroll
- Recreated Apple's Vision Pro landing page with smooth scroll-based animations, parallax effects, and modern visual transitions using GSAP and ScrollTrigger
- Enhanced UX with Locomotive Scroll for seamless scroll inertia and responsive layout across all devices
- Live Demo: [Apple Vision Clone](#)

Sidcup Family Golf Clone Website

- Tech Stack: HTML5, CSS3, GSAP, ScrollTrigger, Locomotive Scroll
- Built a pixel-perfect animated clone of the Sidcup Family Golf website with advanced scroll-triggered effects and modern UI interactions
- Focused on animation timing, scroll control, and clean CSS structure for a visually engaging front-end project
- Live Demo: [Sidcup Family Golf Clone](#)
